Introduction to Electrical Engineering - dl4a.org

In communication systems, signal processing, and electrical engineering, a signal is a function that "conveys information about the behavior or attributes of some phenomenon". A signal may also be defined as an "observable change in a quantifiable entity". In the physical world, any quantity exhibiting variation in time or variation in space ...

Signal - Wikipedia

Typical entry requirements Honours Degree: Our normal entry requirement is an upper second-class honours degree or higher (or equivalent) in communication engineering, electronic engineering, electrical engineering, or in a closely related discipline.

MSc Wireless Communications Masters | Electronics

In electronics, noise temperature is one way of expressing the level of available noise power introduced by a component or source. The power spectral density of the noise is expressed in terms of the temperature (in kelvins) that would produce that level of Johnson-Nyquist noise, thus:

Noise temperature - Wikipedia

Digital Signal Processing (DSP) Return to www.101science.com home page. DSP a crash course. Digital

signal processing is still a new technology and is rapidly developing.

101 Digital Signal Processing - www.101science.com

@Tesla: I do not know much about the channel model for power line communications (except that the channel is a wire, ofcourse). However, for OFDM aspect may I point to couple of articles which I have written in the past.

Allgemein. In der praktischen Verwendung wird bei der Quantisierung eine physikalische Größe im Rahmen einer Messung gemäß einem Messprinzip zur weiteren Verarbeitung oft in ein elektrisches Signal umgeformt und so quantitativ bestimmt.

Quantisierung (Signalverarbeitung) - Wikipedia

Discuss the Rayleigh channel model as a simple probabilistic model for an environment with large number of random reflectors.

Rayleigh multipath channel model - dspLog
