Corrosion and Degradation of Materials Interaction of the material with its environment. Changes in properties due to the interaction (mechanical ductility or strength, physical properties, or appearance). Mechanisms of Deterioration: These depend on the type of material: Metals : Either materials loss by dissolution (corrosion) or formation of a

Corrosion and Degradation of Materials - UPRM

Corrosion is the deterioration of materials by chemical interaction with their environment. The term corrosion is sometimes also applied to the degradation of plastics, concrete and wood, but generally refers to metals.
